Squirrely Obstacle Course

A former NASA engineer uses mechanical engineering to outsmart the squirrels and keep them away from bird feeders.

Third Time's the Charm

This 12-year-old girl displays remarkable talent as well as poise and persistence during her *America's Got Talent* audition.

NEWS AND VIEWS

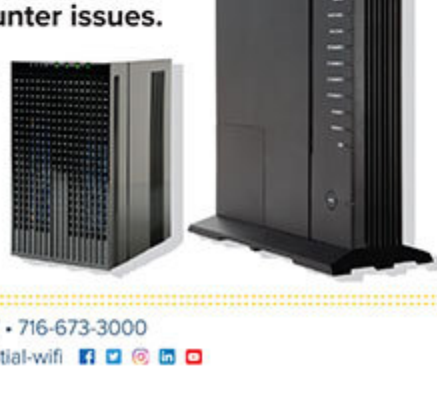

Optimize Your Wi-Fi For Your Increased Internet Needs

WHAT IS Managed Wi-Fi?

Managed Wi-Fi routers are the latest in Wi-Fi technology. They offer a variety of features that optimize your wireless Internet signal so you get the most out of your connection.

Managed Wi-Fi routers...

- Can handle more devices than a basic router.
- Are able to adapt to interferences from outside sources, such as your neighbor's Wi-Fi.
When Wi-Fi signals on the same frequency overlap, it can cause interference in your connection. The Calix GigaCenter used with Managed Wi-Fi can detect when other signals are hampering yours, and will switch to another less crowded frequency. The GigaCenter does this automatically, without any interruption to your service.
- Are easier to troubleshoot if you do encounter issues.
Managed Wi-Fi routers have a convenient dashboard our support team can access to see exactly what the problem is and where it is happening. This allows us to resolve any potential issues quickly and remotely.
